

PressTeck Manufacturing – Drug Delivery Device Components

PressTeck is an international provider of innovative, drug delivery device components to the pharmaceutical industry. With our experience and reputation for quality, PressTeck specialize in supplying aerosol cans for Metered Dose Inhalers (MDI) and valve components as well as metal components for other medical devices. PressTeck has a global presence supplying customers in all geographical regions. We supply pharmaceutical companies and we have a significant presence in the markets.

MDI SOLUTIONS FOR HFA FORMULATIONS

PressTeck maintains its position at the forefront of the pharmaceutical market through continuous technological development and an innovative approach. One of our most significant advancements include pioneering new can solutions for the MDI industry as it moves from CFC to HFA propellants. We have a large range of MDI solutions for HFA formulations and a wealth of experience in helping customers make the right decisions at the earliest time. We supply anodised, plain of aluminium MDI cans and of stainless Steel MDI cans.
